

Solway Precast Products Limited operates a production facility in South-West Scotland. Products supplied include a wide range of reinforced bespoke and standard and precast products for a diverse customer base.

We are focused on creating a culture which is committed to providing the highest quality precast products and service to our clients. This will be achieved by operating and implementing our business quality management system which is driven by leadership to build commitment to deliver the approach “Do it right or not at all” by all our team.

We are committed to achieving this by:

- Maintaining a robust certified quality management system consisting of policies and procedures that are appropriate to our activities, providing a framework to manage risk and to deliver improvements in compliance, competency and sustainable performance
- Ensuring that all relevant legislation and other requirements for Quality are met and exceeded where best practice is available. Solway Precast has made significant investment in time and people developing a culture of “Do it right or not at all” vision of being renowned for quality precast products and be a supplier of choice to our clients.
- Take full responsibility for delivery, setting high standards for ourselves and our suppliers. By collaborating with all with all parties, we continually strive to reduce quality defects
- Measure performance through setting annual objectives, targets, holding management reviews ensuring the continuing effectiveness and appropriateness of our systems, policies, processes and monitoring progress on objectives and targets that were set.
- Always comply with the requirements of ISO 9001 - 2015.

The board of directors are responsible for ensuring that all resources and infrastructure necessary for the implementing this statement are provided. Their roles and responsibilities for the management of Quality are outlined in the company manual.

Copies of this policy are available on request and are posted on the company notice boards.
